
Given the Karnaugh Map, which one is the simplified sum of products (SOP) expression?

a. B'D' + BD → correct answer

b. B'D + BD'4

Given the Karnaugh Map, write the simplified product of sums (POS) expression.

Take 0s on the map to find SOP of F' and then apply DeMorgans law to find F in POS form.

F' = B' D + B D'

POS → F = **(B + D')(B' + D)**
